

SHEET MOULDING PRESS

Model No.
K-SMP-01

Description

Kant Plastology is dedicatedly involved in offering wide array of SHEET MOULDING PRESS. The product is manufactured by using optimum grade raw material and latest technology at our state of art manufacturing unit. The rigid structure with elegant look is basic features of the floor mounting machine. The product has good temperature accuracy due to using of micro processor based double display digital PID controller.

Specification

MODEL (K-SMP-01)	
System Status	Digital
Model	Rigid floor standing model
Sample Mould	Rectangular spacer frame type mould to produce 100mm x 120mm x 4mm thick PE sheet other size available at optional
Platen Type	Twin plate type mould with heating & cooling systems
Heating System	High efficient industrial flat heater in both heater plates
Temperature Controller	Micro processor based double display digital PID controller
Temperature Range	Ambient to 200°C
Working Pressure	Pressure up to 150kg/cm ² / build-up through heavy duty 20 Ton hydraulic jack
Insulation	Heat insulator inserted between heating & cooling plates
Paint	Powder coating
Power Supply	230V AC, Single phase, 50Hz
